The Union Jack

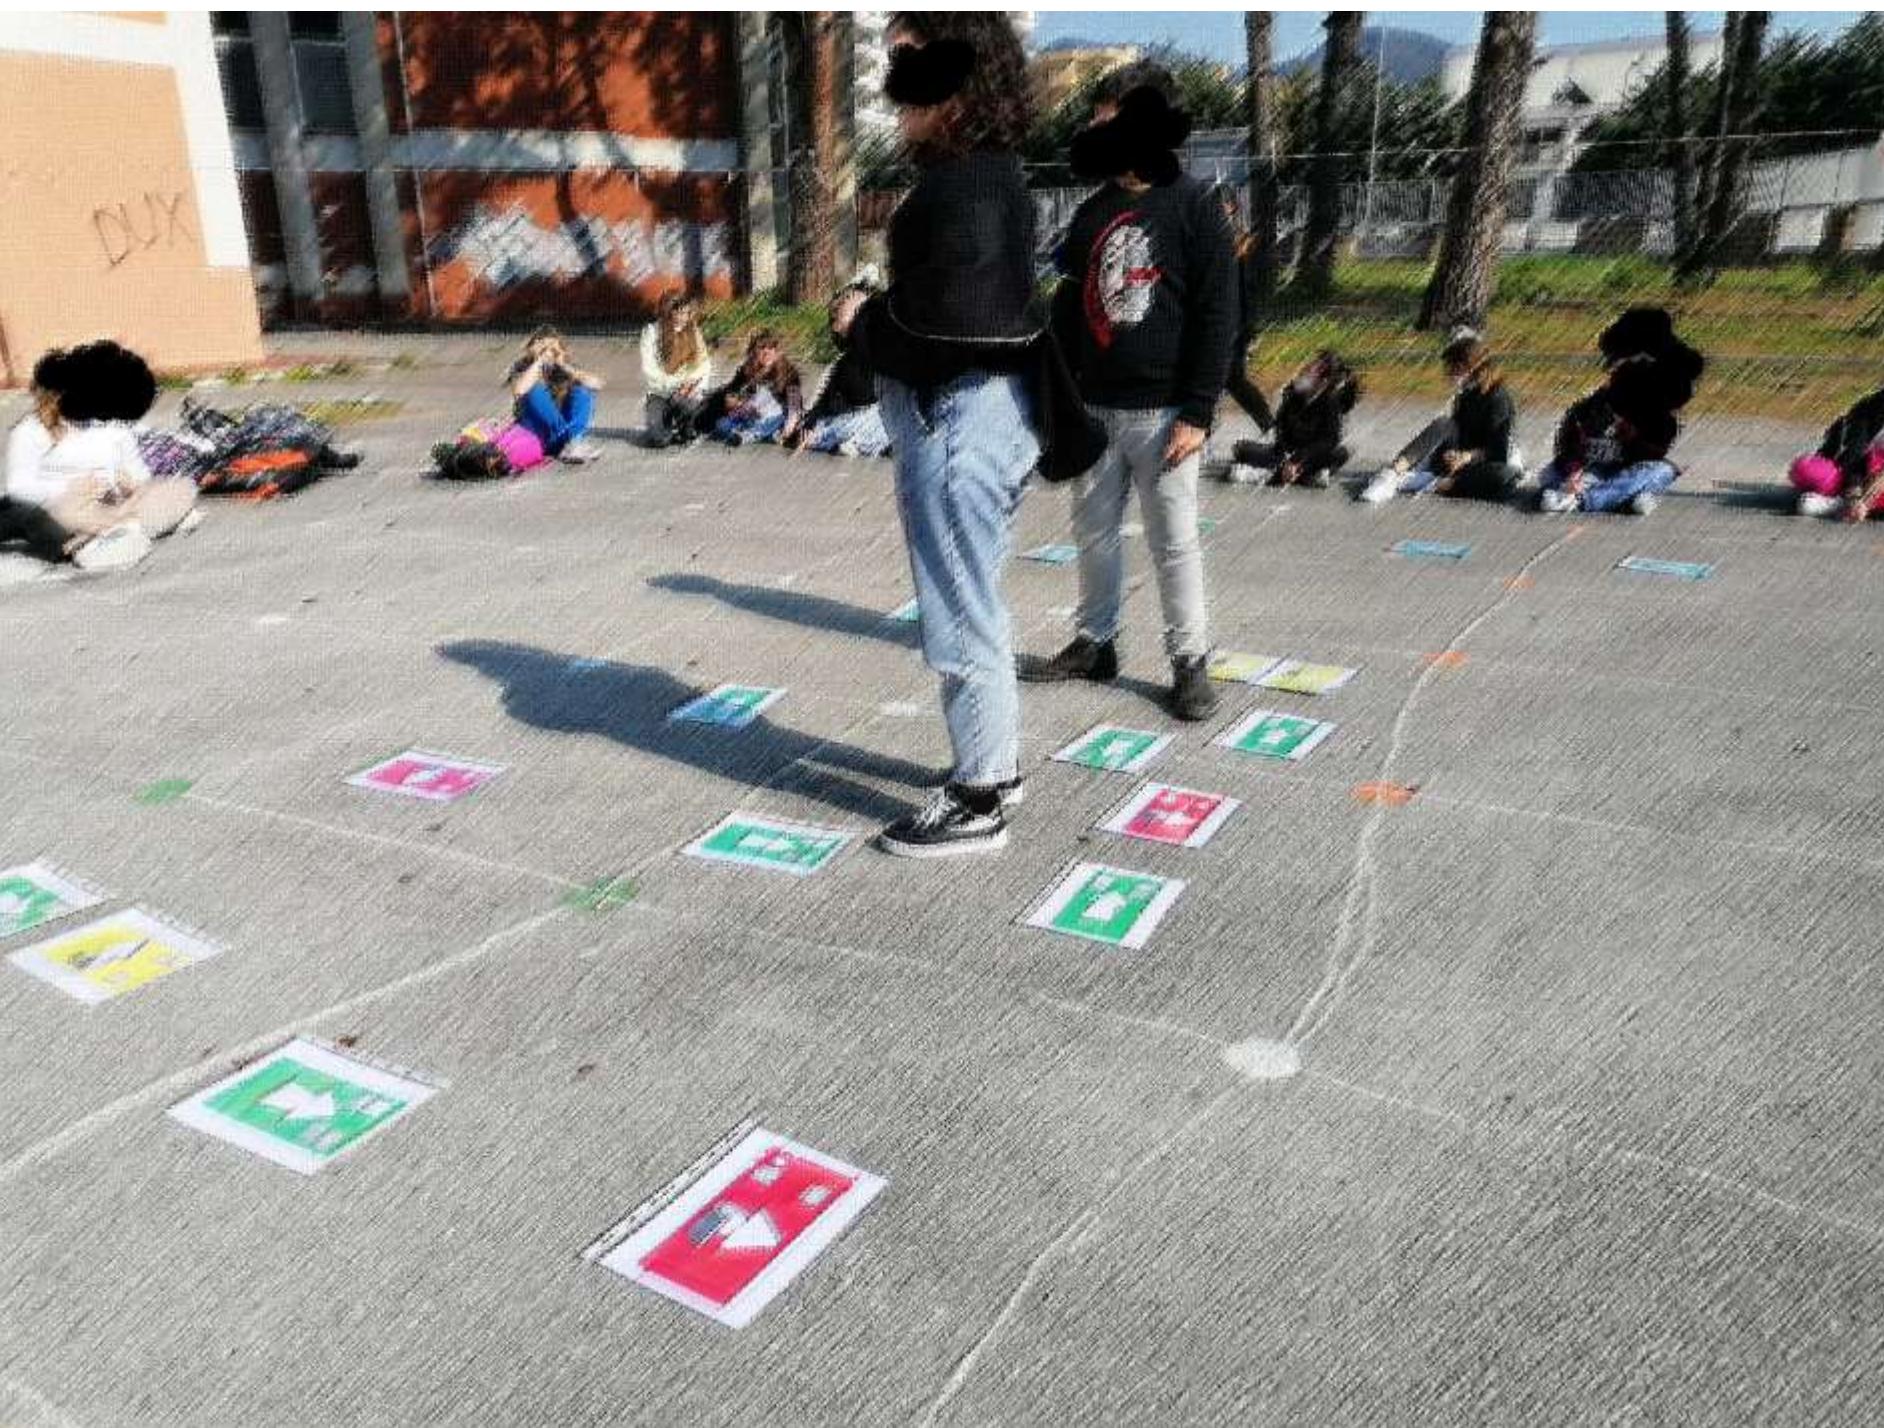

Studiare attraverso il Coding Unplugged

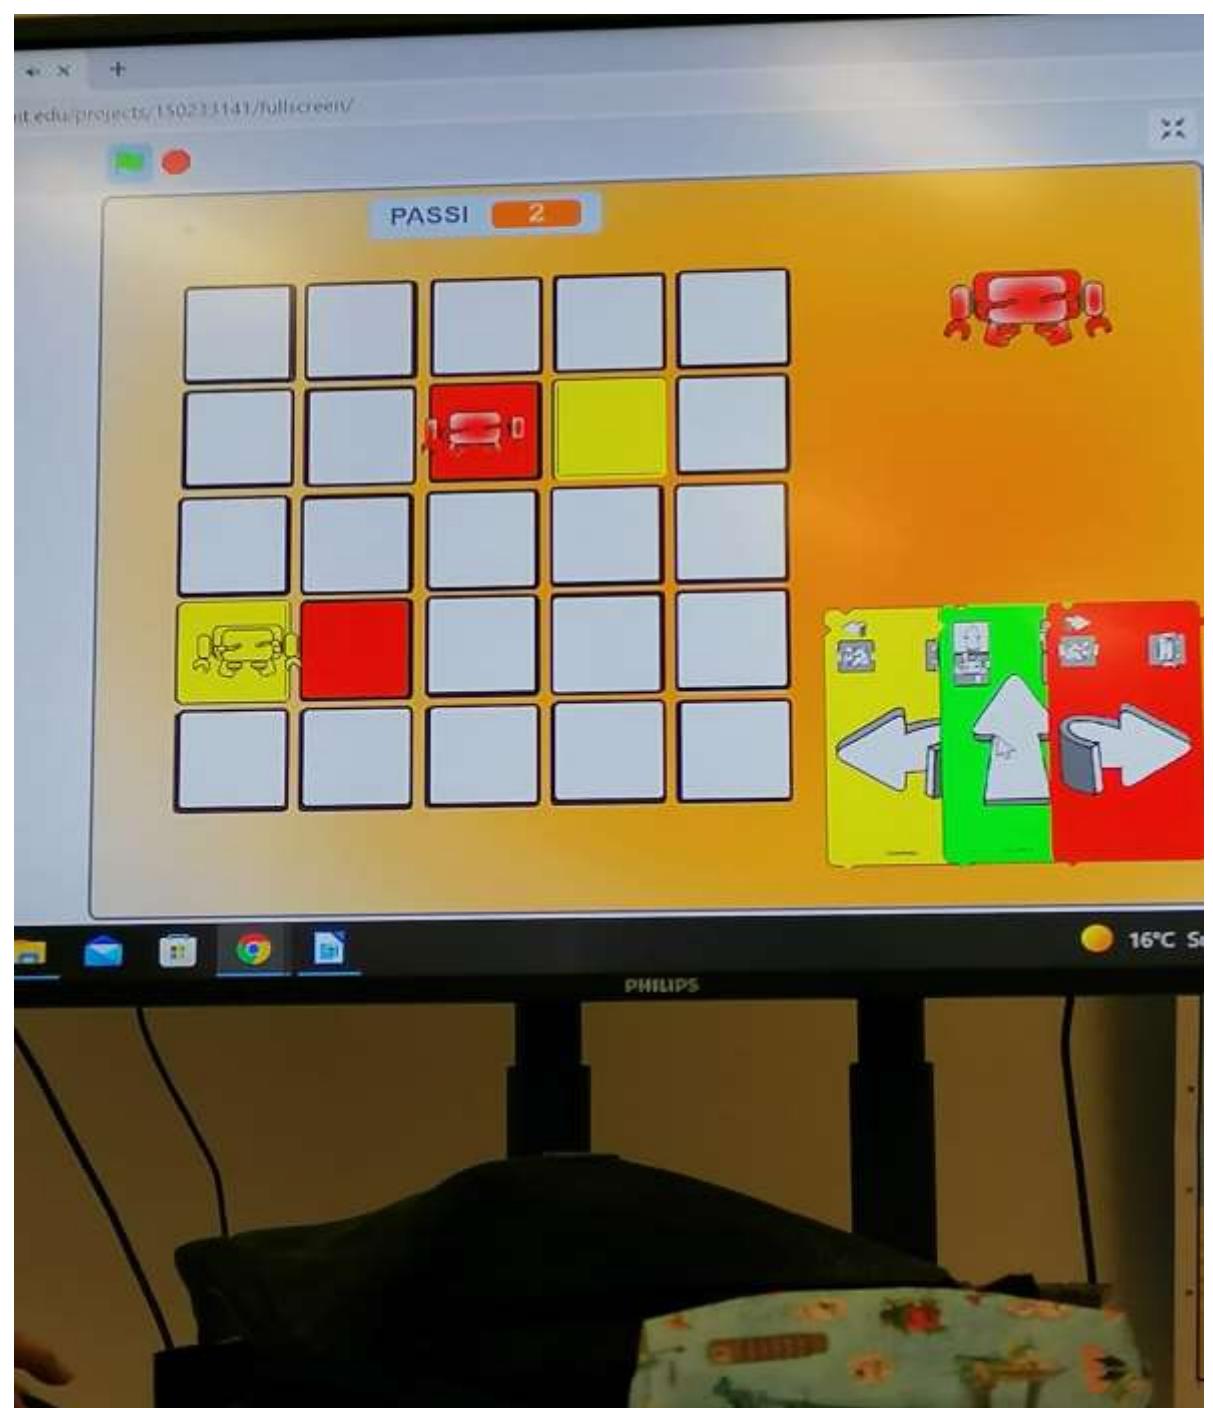

Asking and giving directions

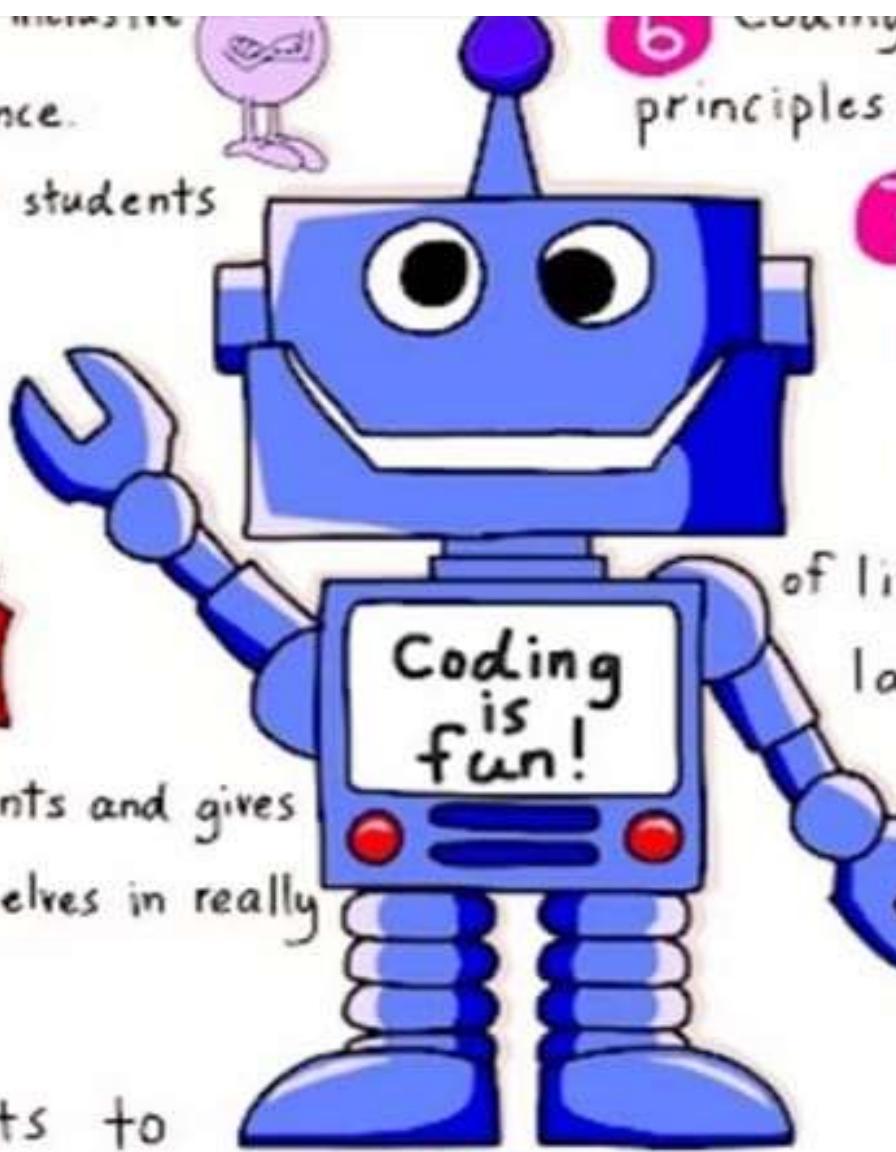

The Scratch Jr. workspace. On the left, there's a character icon of a girl named "Bambina" and a plus sign button. In the center, a scene shows a girl standing next to a yellow bed with a speech bubble that says "Time to go to school!". Below the stage are various Scratch Jr. blocks, including control, motion, sound, and sensing blocks. At the bottom, there's a preview window showing a character walking and a status bar with a progress bar labeled "100% done" and a timer.

The war of robots

- 
- 1 Coding allows students to create content, not just consume it.
 - 2 Coding empowers students and gives them tools to express themselves in really cool ways.
 - 3 Coding teaches story-telling with games and animations.
 - 4 Coding is a place for students to take risks & fail safely.
 - 5 Coding is innovative & builds self-confidence.
 - 6 Coding supports learning principles of mathematics.
 - 7 Coding teaches problem-solving and critical/analytical thinking skills.
 - 8 Coding is a new type of literacy and will be a large part of future jobs.
 - 9 Coding develops teamwork & collaborative skills.
 - 10 Coding can help humanity.
- BONUS:** Coding gives you SUPER POWERS!
